
WordCount Documentation

Release 0.1

Harsha

Nov 21, 2019

Contents

1	Purpose	1
1.1	Zipf's law	1
2	Dependencies	3
2.1	Required	3
2.2	Optional	3
3	Usage	5
3.1	How to clone the code	5
3.2	Make	5
3.3	Snakemake	5
3.4	Where to find the results	5
4	Credit and inspiration	7
5	Exercises (documentation lesson)	9
5.1	Before you start	9
5.2	Basic	9
5.3	Advanced	10
5.4	Meta	10

CHAPTER 1

Purpose

Write me ...

1.1 Zipf's law

Write me ...

2.1 Required

- Python
- Numpy
- Matplotlib
- Make or Snakemake

2.2 Optional

- Docker

3.1 How to clone the code

Write me ...

3.2 Make

Generate all results:

```
$ make
```

3.3 Snakemake

Write me ...

3.4 Where to find the results

Write me ...

CHAPTER 4

Credit and inspiration

Inspired by and derived from <https://hpc-carpentry.github.io/hpc-python/> which is distributed under CC-BY 4.0 (<https://creativecommons.org/licenses/by/4.0/>).

Exercises (documentation lesson)

5.1 Before you start

- Discuss the exercise idea with the classroom.
- Distribute exercises among groups of 2-3 persons.
- Open a GitHub issue and inform the community about the problem and how you plan to solve it. Discuss why we do this.
- Fork this project.
- Commit to your fork. In your commit message auto-close the issue you have addressed.
- Submit a pull request.
- We then review the pull requests.
- After the pull requests are merged we verify that documentation updates itself.

5.2 Basic

- Document the purpose of this example code.
- Document how to clone the code.
- Describe the project tree structure.
- Write a sentence or two about Zipf's law and link to Wikipedia (coordinate with the group working on the previous exercise).
- Document how to check the code style with `pycodestyle`.
- Give other developers hints on how they can contribute to the documentation.
- Document how to build the documentation locally (coordinate with the group working on the previous exercise).
- Add an example output.

- Add an example plot (coordinate with the group working on the previous exercise).
- Document where/how to ask for help.
- Add a math equation somewhere.

5.3 Advanced

- Add a test and document how to run it.
- Add the possibility to auto-document Python code.

5.4 Meta

- Add new exercises ideas for future workshops (edit this file).
